

IS YOUR ROOF LEAKING? HAVE HAIL DAMAGE? JUST NEED A NEW ROOF?

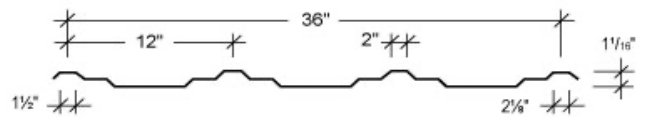

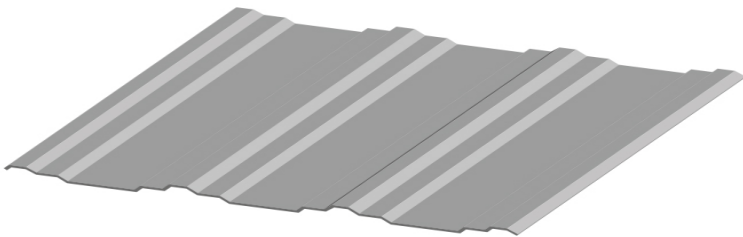

Replacing your commercial metal roof can be a daunting task. At The Metal Roof Company, we install multiple proprietary metal roofs to recover your old metal roof and keep your business running during construction bringing stress free results every time.

“The Retro-R”

The Retro-R is an economical roof recover system, with a 30-year expected service life. The system lays over the existing roof system, without the need for old roof removal, keeping your facility running during installation. The system does not need specialized clips, substructure framing, or insulation for install, making it the most affordable metal-over-metal recovery system in existence.

Features

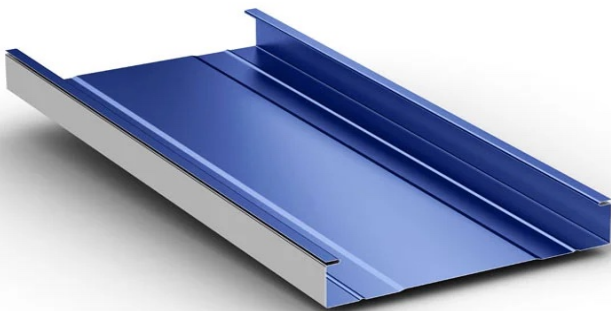

- Coverage Width - 36"
- Minimum Slope - 1/2:12
- Panel Attachment - Exposed Fastening System
- Gauge - 29 (standard); 26
- Finishes - Smooth (standard)
- Coatings - Galvalume Plus®, Signature® 200
- Rib Spacing - 12" on center
- Rib Height - 1-1/16"

“The 238T Seam”

The 238T Seam is the premier solution to metal-over-metal roof recovery, combining pleasing aesthetics with no exposed fasteners, continuous length panels from eave to ridge with no splices, ability to replace individual panels after install, efficient cost savings in labor due to streamlined installation process, improved building efficiency with addition of foam under system, and expected service life of 60+ years!

Features

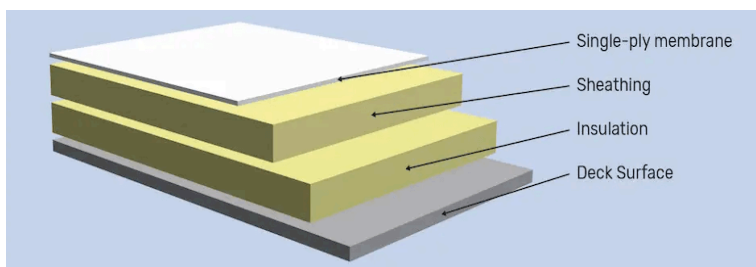

- Coverage Width – up to 24"
- Minimum Slope – 1/2:12
- Panel Attachment -Hidden Fastening System
- Gauge - 24 / 22 (optional)
- Insulation Under panel adding R-value
- Coatings - Galvalume Plus®, Kynar 500
- T-Seam with butyl sealant
- Seam Height – 2 3/8"

“The PVC Single-Ply”

The Single-Ply is another economical roof recover system, with a 40-45 year expected service life. The system lays insulation over the existing roof system, without the need for old roof removal, keeping your facility running during installation..

Features

- Coverage Width 120”
- Insulation -2”-6”
- Minimum Slope - 1/2:12
- Roof Board – Multiple options
- Thickness- 50mil-80mil
- Finishes - Smooth (standard)
- Color – White
